## ROOF NOTICE

When performing fumigations, it is necessary to walk and work on roofs of structures. This obviously creates situations where damage to delicate or old roofs may be unavoidable. We do not wish to unnecessarily damage anyone's roof. To minimize damage and avoid any misunderstanding, we are making the following recommendations:

1. A representative of 4 Less Termite, Inc. or First Class Fumigation will be available, if requested prior to fumigation, for appointments to discuss your roof conditions.
2. Upon arrival at the job site, the First Class Fumigation crew will check the roof(s) and notify 4 Less Termite, Inc. of any previous damage and in some cases, will note any expectations of the possibility of further damage or breakage.
3. I have been expressly informed by 4 Less Termite, Inc. and First Class Fumigation that due to the brittle and fragile nature of tile, metal, or other delicate roofs, some damage may occur while placing and removing tarpaulins during the fumigation of the structure.

With full knowledge thereof, by signing below I (we) hold harmless 4 Less Termite, Inc. and First Class Fumigation from the entire risk of damages during the course of fumigation of this structure.
